• FIG. 00 - HALF-YEARLY REPORT | SAMPLE

HINDI NEWS · HALF-YEARLY REPORT

Apr – Sep 2026 (H1, FY 2026-27)

Detailed findings, data, observations and the StatAxis viewpoint. Prepared for client@example.com.

STX INDEX **Highest: Sample News A - 69.9 | Average of 8 scored channels: 55.2**

STX is StatAxis's own 0-100 score for a channel, over this period. A dash means not enough data.

INSIDE

- At a glance: the numbers, what stands out, our viewpoint
- The STX Index, channel by channel, and the trend
- Detailed findings, one by one
- The data: every figure, period by period
- Observations, method and our closing viewpoint

AT A GLANCE

21,552.5M	69.9	52,073	8
TOTAL VIEWS videos uploaded in the period	HIGHEST STX INDEX Sample News A	PEAK AUDIENCE concurrent viewers, all streams	CHANNELS MEASURED all with an STX Index

WHAT STANDS OUT

- Sample News A has the highest STX Index: 69.9.
- Sample News B leads on views with 4,261.4M (19.8% of the total).
- Sample News G moved up 3 places against the previous half-year.
- The top three channels hold 58.2% of all views.

STATAXIS VIEWPOINT

STX Index: Sample News A is highest at 69.9; the average of the 8 scored channels is 55.2. Sample News B and Sample News A lead on views, and the audience is spread widely. Read the figures with the period in mind: they are measured on YouTube, not on television.

SAMPLE

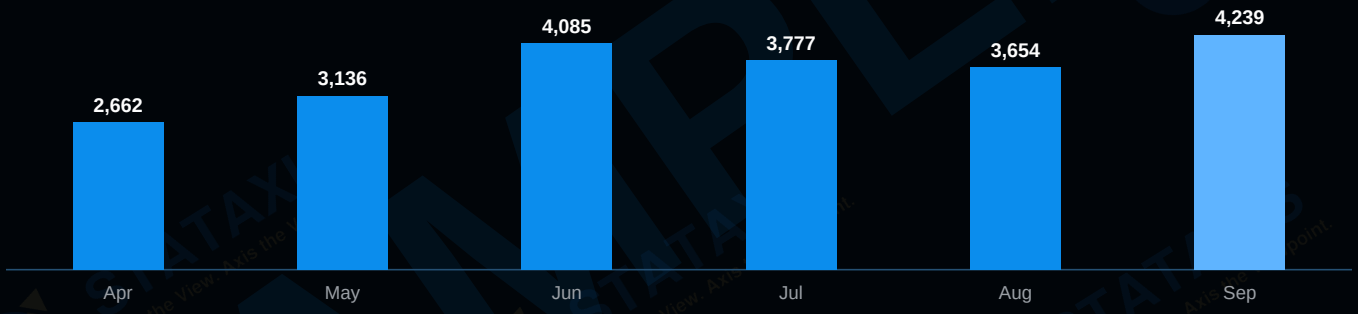

THE STX INDEX, CHANNEL BY CHANNEL

STX is StatAxis's own 0-100 score for a channel: audience, momentum, consistency and more, in one number, with a confidence beside it.

#	Channel	STX Index	Views (M)	Share %
01	Sample News B	66.5	4,261.4	19.8
02	Sample News A	69.9	4,203.2	19.5
03	Sample News C	60.4	4,076.9	18.9
04	Sample News E	53.2	2,840.7	13.2
05	Sample News D	57.4	2,657.7	12.3
06	Sample News F	49.3	1,931.2	9.0
07	Sample News G	43.9	984.1	4.6
08	Sample News H	40.8	597.3	2.8

VIEWS MONTH BY MONTH

million views of new videos

DETAILED FINDINGS

01

Sample News B leads on views, Sample News A leads on STX

Sample News B collected 4,261.4M views, 1.01 times Sample News A. The STX Index, which also weighs audience, momentum and consistency, is highest for Sample News A at 69.9.

For you: Views show who was watched; STX shows who is strongest overall. Read the two together before choosing where to place a campaign.

02

The top three hold 58.2% of all views

Sample News B, Sample News A and Sample News C together hold 58.2% of the 21,552.5M views; the other 5 share the rest.

For you: A crowded top means rankings can change with one big story; a wide gap means the lead is safer.

03

Sample News G is the mover of the half-year

Sample News G now stands at number 7 with an STX Index of 43.9, up on the previous half-year.

For you: A channel that climbs on STX before it climbs on views is often the one to watch next.

04

The gap between Sample News B and Sample News A is 58.2M views

That is 1.4% more than the runner-up. The channels at the bottom, Sample News G and Sample News H, hold 7.4% between them.

For you: A wide gap at the top is a safer lead; a narrow one can change in a single news cycle.

05

STX is spread from 40.8 to 69.9

The average STX Index of the 8 channels is 55.2. Sample News A is 14.7 points above the average.

For you: STX separates channels that look alike on views: use it to choose between two channels that draw similar audiences.

THE DATA, PERIOD BY PERIOD

Views month by month: million views of new videos

Period	Value	Against the average
Apr	2,662	-26%
May	3,136	-13%
Jun	4,085	+14%
Jul	3,777	+5%
Aug	3,654	+2%
Sep	4,239	+18%

EVERY CHANNEL

#	Channel	STX Index	Views (M)	Share %
01	Sample News B	66.5	4,261.4	19.8
02	Sample News A	69.9	4,203.2	19.5
03	Sample News C	60.4	4,076.9	18.9
04	Sample News E	53.2	2,840.7	13.2
05	Sample News D	57.4	2,657.7	12.3
06	Sample News F	49.3	1,931.2	9.0
07	Sample News G	43.9	984.1	4.6
08	Sample News H	40.8	597.3	2.8

OBSERVATIONS

- Views are measured on YouTube for the videos uploaded in this half-year, as last measured; STX is each channel's score over the same period.
- This half-year covers 183 days; a short window can be moved by a single event.
- Channels with little data carry a lower confidence and are pulled toward 50 so they cannot look more certain than they are.
- The ranking is by views; the STX column beside it ranks the same channels by overall strength, so the two orders can differ.

HOW THESE NUMBERS WERE WORKED OUT

Views are what YouTube reports for videos uploaded in the period, as last measured by StatAxis. The STX Index is StatAxis's own score and is pulled toward 50 when data is thin. Nothing is estimated; a dash means not enough data. Measured from public YouTube data: this is not TV ratings and not a statement about who watched.

STATAXIS VIEWPOINT

STX Index: Sample News A is highest at 69.9; the average of the 8 scored channels is 55.2. Sample News B and Sample News A lead on views, and the audience is spread widely. Read the figures with the period in mind: they are measured on YouTube, not on television.
